

## Wiki - Create a Page

**NOTE:** To make any changes/additions to your course you must have the Edit mode “on”. To do this just click on the word “On” or “Off”. When the mode is in Off, you have a view of what the student can see.

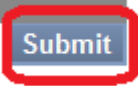

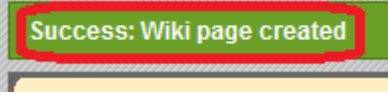

NOTE: The Wiki must be created in order to create a new page. To do this see the how to doc for Wiki - Create a Wiki

**Barebones Instructions** – To see detailed instruction with screen shots look at the table below and on the next page.

1. Open the Wiki and click Create Wiki Page (top left side of screen).
2. Under Wiki Page Content, enter the Name of the homepage.
3. You can type text in the Content text box. Use the Text Editor at the top of the text box to add images, links, multimedia, etc. You can also add attachments and choose whether or not attachments should open in a new window.
4. Click Submit when you are finished adding content.
5. At the top of the next screen you will see Success: Wiki page created in a green banner.
6. In the top-right of the screen you will see About This Wiki and you will note that the number of pages has increased. Below that, in Resources, you will see the page that you just added.

### Directions with Screenshots

<p>Step One</p> <p>Open the Wiki and click Create Wiki Page (top left side of screen).</p>
